Md Amir

Full Stack Web Developer

PROFESSIONAL SUMMARY

Motivated and aspiring full stack web developer, proficient in HTML, CSS, JavaScript, and React for front-end development, and skilled in backend technologies, including Node.js, Express.js, and MongoDB. Additionally, well-versed in data structures & algorithms, using Java for server-side development. Eager to forge a dynamic career in web development, bringing a genuine passion for coding and a commitment to continual learning.

PROJECTS

1. Gem Garden | ⊕ | ⦿
React.js | CSS3 | Redux | JavaScript | Git | Firebase | Razorpay | Responsive web design | RESTful APIs | Vercel | Chakra UI

- Crafted an intuitive navbar for an online jewelry store, facilitating seamless exploration of curated collections and ensuring a visually appealing, responsive interface.
- Innovated dynamic features to enhance user engagement and navigation across desktop and mobile platforms.
- Engineered a comprehensive footer with essential information, contact details, and secure transaction links to bolster user confidence during purchases.

2. Bewakoof.com | ⊕ | ⦿
HTML5 | CSS3 | JavaScript | Git | RESTful APIs | Responsive Web Design

- Bewakoof.com is an e-commerce website, a clone of Bewakoof.com, where you can buy a variety of clothes from different categories.
- Developed using HTML5, CSS3, JavaScript, Git, and RESTful APIs.
- Implemented responsive web design for seamless browsing on various devices.
- Optimized the checkout process, integrated secure payment gateways, and implemented order tracking for a streamlined e-commerce experience.
- Enhanced the user experience on the cart page by optimizing the layout and implementing dynamic features for seamless item management.
